THE RUSHMORE SYSTEM

- The Rushmore hinge is specifically designed for large openings in curtain walling
- Significantly enlarged glazed area made possible by the Rushmore means fewer broken sightlines
- Windows can be manually operated or mechanically or motor driven to control opening and closing
- Helps provide natural ventilation or smoke evacuation in commercial buildings
- Easily supports bottom hung vents of 350kg and 4.2 metres high*
- Easily supports top hung vents of 250kg and 3 metres high*
- Successfully tested to 10,000 cycles
- The Rushmore is constructed in robust 304 grade austenitic steel - quality built to last.

WINDOW AUTOMATION

If the windows are to be automated, Securistyle can supply all required technical details on the types of synchronous motors to be used, their placement etc. These motors and their power packs, cabling etc. can also be supplied by Securistyle, as part of the total hardware package for the window, as can all relevant perimeter locks & handles etc.

Windows incorporating Rushmore technology tend to be large and heavy. In every case, we strongly advise you to contact our Technical Department for further advice.

** Fully tested parameters. Larger vents can be tested on a project specific basis.*
